**Performance Partnership Agreement
between
Indiana Department of Environmental Management
and
U.S. Environmental Protection Agency, Region 5
July 1, 2015 – June 30, 2017**

Purpose of the PPA

The Indiana Department of Environmental Management (IDEM) and the U.S. Environmental Protection Agency, Region 5 (U.S. EPA R5) have entered into their 10th Performance Partnership Agreement (PPA). This biennial agreement identifies program specific priorities and joint priorities, and objectives between the two agencies. The purpose of this agreement includes:

1. Identifying joint priorities and specific program goals.
2. Outlining key strategies for each priority and goal.
3. Describing each agency's roles and responsibilities.
4. Setting the term of this agreement from July 1, 2015, to June 30, 2017.

The PPA is a product of the National Environmental Performance Partnership System (NEPPS), a joint initiative of U.S. EPA Headquarters (HQ) and the Environmental Council of States (ECOS). The objective of the NEPPS initiative is to strengthen protection of public health and the environment by directing limited resources toward a state's most pressing environmental issues. The PPA, formed under NEPPS, is designed to provide states and U.S. EPA HQ with flexibility in achieving environmental results and to enhance accountability in realizing environmental progress. The Performance Partnership Grant (PPG) is the federal grant used to fund many of the PPA activities.

Scope of the PPA

The PPA primarily focuses on activities that are funded by PPG dollars. The scope of the PPA does not encompass the entire workload of each agency, but is designed to be a concise, strategic document used to focus limited resources on specific outcomes. In addition to the activities described within the PPA, IDEM has more detailed work plans to address and complete the elements committed to within this agreement.

Grants Covered Under the PPA

IDEM utilizes the PPA to serve as the work plan for activities to be funded through the PPG. IDEM chooses to include non-PPG federal and state grant activities in the PPA as this structure has successfully provided IDEM more flexibility in the use of federal financial resources to address environmental issues using a multifaceted approach, and has reduced the administrative burden of having numerous specific categorical grants tied to work plans. The PPG allows for the continuance of key resource investments that have already been determined to be priority activities. All personnel costs for the 2015-2017 PPG will be provided in detail by individual program function in the budget narrative portion of the 2015-2017 PPG grant application.

The following PPG federal grant fund activities are included in the PPA:

1. Air Section 105
2. Public Water Supervision
3. Surface Water Section 106
4. Ground Water Section 106
5. Resource Conservation Recovery Act
6. Toxic Substances Control Act - Polychlorinated Biphenyls

The following non-PPG activities, funded by non-PPG federal grants, are included in the PPA:

1. Solid Waste Disposal Act of 1976
2. Counter Terrorism Safe Drinking Water Act
3. BioWatch – Homeland Security Act of 2002
4. Diesel Emissions Reduction Act

The following activities funded by state monies are included in the PPA:

1. Title V Operating Permits
2. Dedicated Asbestos Trust Fund
3. Water Quality Permits
4. Compliance Monitoring Strategy Funds
5. Permitting and Enforcement Grant
6. Outreach Operator Training
7. Total Maximum Daily Loads Fees

Fiscal Responsibility

With the receipt of federal funds comes the responsibility to successfully track the achievements of the program and demonstrate results. To achieve the goals of transparent grants management, IDEM has incorporated standard operating procedures (SOPs), a grants management policy, and a grants data tracking system to direct the application, receipt, use and closeout of all grants the agency receives. This approach provides for easy information sharing and interaction between the awarding agencies and IDEM.

Development and Elements of the PPA

The development process includes the following:

- a) **Draft Objectives and Activities:** An initial list of PPA activities is drafted by IDEM staff discussing and listing the past, present and future goals of each program area.
- b) **Draft Joint Priority List:** The draft joint priority list is developed from the initial draft of objectives and activities, focusing on those priorities that are funded primarily by U.S. EPA R5 grants.
- c) **Draft PPA:** The draft joint priorities are confirmed by IDEM senior staff and compiled into a draft PPA that is then shared with U.S. EPA R5 and the rest of the agency.
- d) **Kickoff Meeting:** The draft PPA is presented to U.S. EPA R5 during a kickoff meeting, with special time dedicated to the discussion of joint priorities.

- e) **Program Work Group Discussion:** Program work groups from both agencies will meet jointly to discuss work plans, goals and PPA priorities.
- f) **Final PPA:** The final PPA is a result of shared discussions and mutual agreement between the agencies.

The elements include the following:

1. **Accountability:** The PPA provides a framework for accountability by clearly identifying IDEM and U.S. EPA R5 actions, roles and program area contacts.
2. **Joint Assessment:** The PPA requires a joint assessment of the activity work plans. The joint assessment is comprised of two activities between IDEM and U.S. EPA R5: the Joint Assessment Meeting and the Joint Assessment (JA) Report. The meeting and report occur at the end of the first year of a PPA cycle and highlight successful program achievements, identify areas that need improvement and/or additional resources, and provide a mechanism for discussions and adjustments in specific program directions or approaches.
3. **Final Report:** The reporting elements of the PPA will be incorporated into a formal closure report, referred to in this agreement as the Final Assessment (FA) Report.
4. **Flexibility:** The PPA is viewed as a “living document” that is flexible and can be modified, upon agreement, to reflect changes in IDEM and U.S. EPA R5 needs.

Roles of IDEM and U.S. EPA R5

This agreement defines the roles that both IDEM and U.S. EPA R5 will undertake to meet the program commitments. IDEM and U.S. EPA R5 recognize the primary role of IDEM is administering federal environmental programs delegated to the state under federal law and carrying out state programs prescribed under state law. U.S. EPA R5’s role in assisting IDEM includes: addressing multi-state or national issues directly, implementing programs not delegated to IDEM, and working on targeted sectors, watersheds or airsheds in conjunction with IDEM. Several activities are common to both IDEM and U.S. EPA R5, such as permitting, compliance, enforcement, monitoring and outreach.

Enforcement and Compliance Assurance

Program specific compliance and enforcement activities accomplished during the term of this PPA are included in the detailed branch level priorities and the state program specific plans. The following tenets serve as the foundation for IDEM and U.S. EPA R5 relationships with respect to compliance and enforcement activities:

- Utilization of the most effective application of compliance tools to encourage regulated facilities to maintain and, where possible, exceed compliance with environmental laws (e.g., compliance assistance, compliance assurance, administrative/civil enforcement and criminal prosecution).
- Utilization of joint preplanning to coordinate priorities, maximize agency resources, avoid duplication of efforts, eliminate “surprises” and institutionalize communication.
- Management for internal and/or external environmental results.

In addition to providing guidance to IDEM, U.S. EPA R5 has a continuing role in environmental protection in Indiana. U.S. EPA R5 carries out its responsibilities in a variety of ways, including:

- Acting as an environmental steward, ensuring that national standards for the protection of human health and the environment are implemented, monitored and enforced consistently in all states.
- Assisting in conducting inspections and enforcement actions.
- Providing compliance and technical assistance to the state and its regulated entities.
- Providing science-based information to the state and its regulated entities.

Under this agreement, IDEM and U.S. EPA R5 retain their authorities and responsibilities to conduct enforcement and compliance assistance. Enforcement will be accomplished in the spirit of cooperation and trust. Specific federal enforcement and compliance assistance responsibilities include, but are not limited to, the following:

- Working on national priorities and regional priorities.
- Ensuring a level playing field and national consistency across state boundaries.
- Addressing interstate and international pollution (e.g., watersheds and ambient air).
- Addressing criminal violations.
- Conducting enforcement to assure compliance with federal consent decrees, consent agreements, federal interagency agreements, judgments and orders.
- Conducting state reviews in accordance with the National State Review Framework, ensuring that follow-up actions that resulted from this review are carried out in a timely and effective manner.

Environmental Justice

The following tenet serves as the foundation for IDEM and U.S. EPA R5 relationships with respect to environmental justice (EJ): Utilization of consistently sound science and policy, and utilization of resources to aid all communities in being informed participants in decision-making that affects their environment, health, and well-being. IDEM is in a position to provide leadership in EJ policy development based on IDEM's principle that "All Hoosiers deserve clean air, water, and land." U.S. EPA R5 will provide advice, guidance, and resources to help effectuate EJ.

Quality Management Plans

IDEM's Quality Management Plan (QMP) documents IDEM's current quality system for environmental data operations. IDEM's QMP, dated September 27, 2012, was approved by U.S. EPA R5 effective February 28, 2013, and will be valid for up to five years, through February 27, 2018. A revised and updated QMP must be submitted for U.S. EPA R5 review and approval not later than six months prior to expiration of the current approved QMP, or earlier if significant changes to IDEM's structure, operations, or quality system occur.

Under the approved QMP, IDEM will continue to self-approve all Quality Assurance Project Plans (QAPPs) and any other quality system documentation required by non-

competitive assistance agreements and delegated programs. All QAPPs and associated quality system documentation required under competitive assistance agreements, by U.S. EPA R5 programs, and/or by federal statute to be approved by U.S. EPA R5 will be submitted as required for review and approval.

To allow U.S. EPA R5 to assess implementation of IDEM's approved QMP as well as quality activities related to assistance agreements, IDEM will submit the following information to the U.S. EPA R5 Quality Manager:

1. Electronic copies of all signed, self-approved QAPPs on a quarterly basis. IDEM, at their option, may upload QAPPs on an on-going basis to the U.S. EPA R5/Great Lakes National Program Office (GLNPO) QA Track database. U.S. EPA R5 will provide written feedback to IDEM on self-approved QAPPs submitted.
2. An annual report submitted by January 31 of each year, as required by the QMP, accompanied by a letter that confirms that the quality system documented in the approved QMP is still in effect, identifies any minor revisions incorporated in the QMP during the preceding year as well as any that are anticipated, and lists all QAPPs that were self-approved during the preceding year. IDEM and U.S. EPA R5 will continue their on-going periodic (currently quarterly) QA conference calls to share information intended to assist with implementation of IDEM's quality program. IDEM also participates in monthly Great Lakes Restoration Initiative (GLRI) QA conference calls chaired by the Great Lakes National Program Office Manager (GLNPO) QA Manager.

Reporting

IDEM will continue to report to U.S. EPA R5 the necessary information, as required and agreed upon, including required timelines. It is recognized that reporting requirements beyond those specifically mentioned in this agreement do exist. Those requirements often relate to populating national databases or to tracking performance against priority activities identified in the internal IDEM work plans. These requirements may be embodied in a variety of existing agreements and are not reiterated in this agreement. IDEM will reference its website and other existing reports as supporting documentation for the PPA and the PPG. Both IDEM and U.S. EPA R5 will report through the JA and FA Reports.

Reporting through the JA Report and the FA Report is completed using the following status tools and a justification of that status for each performance measure:

1. **Complete.** The performance measure elements are complete.
2. **In progress.** The performance measure is progressing towards a specific goal, objective or deadline.
3. **Ongoing.** The performance measure is progressing and will be a continuing measure in the next PPA cycle.
4. **Incomplete.** The performance measure has not been adequately addressed.
5. **Project withdrawn.** The performance measure has been withdrawn due to stated reasons or fiscal constraints.

Along with contacts for both IDEM and U.S. EPA R5, at least one goal and objective from the FY 2014-2018 U.S. EPA's Strategic Plan is assigned to each activity to demonstrate IDEM's efforts to contribute to U.S. EPA's overall goals.

Additionally, the funding sources for each activity are indicated by one of the following:

1. **PPG.** Funds come from the PPG, including the state and federal match portions.
2. **State.** Funds come from the State of Indiana and no federal funds are received to support this measure.
3. **Federal.** Funds come from a federal grant other than the PPG, and, when possible, the specific grant is listed.

If IDEM is presented with a funding shortfall for any performance measure funded by federal dollars agreed upon or negotiated in the PPA, both parties reserve the right to renegotiate and discuss removal of performance measures from the PPA.

Joint Priorities

Joint priorities represent a subset of environmental program responsibilities that IDEM and U.S. EPA R5 agree represent investment priorities.

Examples of joint priorities are as follows:

1. The program area is an important, newly developed initiative that requires the attention of both IDEM and U.S. EPA R5 to adequately develop and implement.
2. The program area is at risk of functioning inadequately, creating a significant vulnerability to the integrity of environmental protection.
3. The program area represents a long-term strategic investment opportunity.
4. The program area offers the opportunity to demonstrate innovations to promote environmental improvements or enable efficiency enhancements.

IDEM and U.S. EPA R5 have identified the following Joint Priorities:

Air Quality Joint Priorities

Per mutual agreement, there are no new or existing priorities for the Air Program.

Land Quality Joint Priorities

U.S. EPA R5 and IDEM will focus their efforts at Resource Conservation and Recovery Act (RCRA) Corrective Action sites that could recontaminate remediated sections of the Grand Calumet River. They will coordinate with the U.S. Army Corps of Engineers (USACE) for a timely application and decision regarding the disposal of Polychlorinated Biphenyls (PCBs) under the Toxic Substance Control Act (TSCA) at the Indiana Harbor confined disposal facility.

Water Quality Joint Priorities

Continue to convert general permits-by-rule to administratively issued general permits.

- IDEM will coordinate the issuance of the general permits with the General Permit rulemaking to ensure all current permittees retain coverage.
- U.S. EPA R5 will work expeditiously to review the draft general permit language and once U.S. EPA R5 agrees, U.S. EPA R5 will issue a non-objection letter so IDEM can proceed with the public notice of the draft permit and subsequently the issuance of the final permit.

E-Enterprise Joint Priorities

U.S. EPA R5 and IDEM will work to collaboratively streamline and apply advanced technology across agencies and programs to make business processes more efficient and effective. E-Enterprise will be implemented by operating in a joint governance partnership to: 1) improve environmental protection through better program performance by streamlining and modernizing business processes and promoting the use of advanced information and monitoring technologies; and 2) enhance services to stakeholders and partners while reducing transaction costs and burdens for the regulated community and governmental agencies.

Joint Planning and Evaluation Process

IDEM and U.S. EPA R5 both agree that it is important to clearly articulate how all the components of the performance partnership agreement are evaluated. In order to evaluate this agreement and complete the previous one, both agencies will participate in a joint planning and evaluation process. The process timeline is as follows:

Actions/Deadlines

2015-2017 PPA begins	July 1, 2015
Final Assessment (FA) Report (2013-2015 PPA)	September 30, 2015
U.S. EPA R5 sends comments on FA Report (2013-2015 PPA)	December 2015
Joint Assessment Meeting (if needed) (2015-2017 PPA)	June 2016
Joint Assessment (JA) Report (2015-2017 PPA)	September 30, 2016
U.S. EPA R5 sends comments on JA Report (2015-2017 PPA)	December 2016
IDEM Senior Management Planning Meeting (2017-2019 PPA)	February 2017
IDEM and U.S. EPA R5 Kickoff Meeting (2017-2019 PPA)	March/April 2017
Draft PPA negotiated and finalized (2017-2019 PPA)	March-May 2017
2017-2019 PPA begins	July 1, 2017
FA Report (2015-2017 PPA)	September 30, 2017

The JA Report will:

- Provide general discussion, measurements of outcomes and analysis of the environmental and programmatic results of each element.
- Identify emerging issues, environmental trends and strategies for improvement.
- Provide flexibility in both form and substance, as warranted by program performance.
- Seek to eliminate duplicative or unnecessary efforts and reporting.
- Respond with appropriate solutions, including redirecting goals and resources.

The success of each outcome of this agreement relies on clear, constructive communication and the commitment of IDEM and U.S. EPA R5 to work together to implement IDEM's Plan-Do-Check-Act model to solve problems and improve the programs. If any differences exist on specific issues or problems, IDEM and U.S. EPA R5 should move quickly to resolve them at the staff level or elevate the issue through the dispute resolution process.

The signing of the Authorizing Signatures page for the final PPA will be the U.S. EPA R5 Regional Administrator and the IDEM Commissioner. The U.S. EPA R5 Deputy Regional Administrator and the IDEM Commissioner will sign a similar Authorizing Signatures page to note the finalization of the JA and FA Reports. Hard copies of the documents shall be addressed to the U.S. EPA R5 Regional Administrator and mailed to the U.S. EPA R5 project officer.

Mutual Accountability

The approach from direct oversight to mutual accountability and joint assessment is a shift from the traditional approach. IDEM and U.S. EPA R5 will jointly assess each program element and determine the appropriate course change as needed. U.S. EPA R5 will review and act on new regulations in program areas that impact Indiana's authorization or where federal statute or regulation requires U.S. EPA R5 review and approval of state actions (e.g., water quality standards).

Dispute Resolution Process

IDEM and U.S. EPA R5 will use the following agreed-upon dispute resolution process to handle the conflicts that may arise during the execution of this agreement. The resolution process will be treated as an opportunity to improve joint efforts and not as an indication of failure. For the purpose of this agreement, the following definitions will apply:

- **Dispute:** Any disagreement over an issue that prevents a matter from going forward.
- **Resolution Process:** A process whereby the parties move from disagreement to agreement over an issue.

Informal Dispute Resolution Guiding Principles

- Recognize conflict as a normal part of the state/federal relationship.
- Approach disagreement as a mutual problem requiring efforts from both agencies to resolve.
- Approach the conflict as an opportunity to improve joint efforts.
- Aim for resolution at the staff level, while keeping management informed.
- Disclose underlying assumptions, frames of reference and other driving forces.
- Clearly differentiate positions and check understanding of content and process with all appropriate or affected parties.
- Document discussions to minimize future misunderstandings.
- Pay attention to time frames and/or deadlines and escalate quickly when necessary.

Formal Conflict Resolution

There are several formalized programmatic conflict resolution procedures that may need to be invoked if the informal route has failed to resolve all issues. Examples include:

- 40 CFR 31.70 (outlines the formal grant dispute procedures).

- National Pollutant Discharge Elimination System (NPDES) conflict resolution procedure.
- Superfund program dispute resolution contract that provides neutral third parties to facilitate conflict resolution for projects accepted into the program.

For matters involving this agreement, the following procedures will be utilized:

1. **Principle:** Disputes should be resolved at the front line or staff level, when feasible.
2. **Time frame:** Disputes should be resolved as quickly as possible and within two (2) weeks of the issue arising at the staff level. If unresolved at the end of two (2) weeks, the issue should be raised to the next staff level of each agency.
3. **Escalation:** When there is no resolution of the issue and the two (2) weeks have passed, there should be comparable escalation in each agency, accompanied by a statement of the issue and a one-page issue paper. A conference call between the parties should be held as soon as possible. Disputes that need to be raised to a higher level should again be raised in comparable fashion in each agency, until resolution is obtained.

Environmental Conditions in Indiana

While objective environmental quality measurements show that Hoosiers and the environment are safer today than at any time since data has been collected, a number of environmental challenges still need to be addressed. IDEM's history shows that IDEM can continue to build on its improvements in order to protect Hoosier health and our environment. Below are steps IDEM has taken to provide a cleaner, healthier Indiana for all Hoosiers.

Air

Indiana's air quality has improved significantly during the last 30 years. Regulatory programs aimed at emission reductions for vehicles and industry have reduced smog and dust levels throughout the state. Voluntary programs, such as ozone education and awareness, diesel retrofits and anti-idling policies, have played an important role in improving Indiana's air quality. In 2009, for the first time since air quality standards were developed in the 1970s, all Hoosiers were breathing air that met current health based standards. A 2015 report, State's View of the Air, shows the downward trend of air pollution continuing in the Hoosier state.

IDEM has been operating an air toxics monitoring network to measure and track hazardous air pollutants since 1999. IDEM has adopted into state law the national emission standards for hazardous air pollutants, which provide industry-specific control technology requirements, so that the state can enforce these federal standards, reducing Hoosiers' exposure to harmful air toxics. IDEM will continue to work to reduce pollutant levels so every Hoosier has healthy air to breathe.

Land

Considerable progress has been made by IDEM's Office of Land Quality (OLQ). Regulations, compliance and enforcement programs aimed at addressing entities that treat, store, generate or dispose of contaminants have had significant impact on the quality of land in Indiana.

In addition to other programs, IDEM has, and will continue to, focus on corrective actions at hazardous waste facilities and leaking underground storage tank sites. Considerable resources have been focused on obtaining and addressing the environmental indicators established through the Government Performance and Results Act. In addition to corrective actions, IDEM is working to more accurately identify owners and operators of underground storage tanks and provide assistance to assure compliance with tank regulations.

A major priority for IDEM has been work on the Grand Calumet River and Indiana Harbor Shipping Canal. IDEM provides technical assistance and permit review for the U.S. Army Corp of Engineers (USACE) Federal navigational dredging project in the Indiana Harbor Shipping Canal. Dredging commenced in September 2012, and will continue for the next thirty (30) years. IDEM will continue to assist the USACE with all applicable permitting and technical issues throughout the project. IDEM will also continue to fulfill its role as beneficiary to settlement trust funds from the 1990 bankruptcy of the former East Chicago, Indiana (ECI) Facility in East Chicago. These funds are administered by the East Chicago Waterway Management District for the cleanup of the ECI properties and long term monitoring and maintenance of the on-site CDF. IDEM reviews and approves the use of the funds.

Along with educating and providing technical assistance to businesses and communities, IDEM's work to issue permits, conduct inspections, respond to accidental spills and oversee cleanups continues to foster marked improvement in the state's land quality each year.

Water

IDEM continues to monitor and assess water quality and to identify general causes and sources of surface water impairments within the state. Many of the specific outputs listed within the water work plan section of this agreement are intended to focus on and address water impairments. IDEM will continue to develop total maximum daily load (TMDL) calculations for priority classes of waters as identified for U.S. EPA's TMDL vision and as required by Section 303(d) of the federal Clean Water Act, to identify sources contributing to the impairment of Indiana's surface water. Additionally, IDEM issues 401 Water Quality Certifications to ensure Indiana's water quality standards are met.

IDEM is a national leader in issuing National Pollutant Discharge Elimination System (NPDES) permits and maintains exemplary compliance and enforcement of those permits, including storm water discharges covered by general permits, to reduce water impairments resulting from point sources. Additionally, IDEM has made significant progress on tracking long term control plan (LTCP) implementation to reduce the incidence of combined sewer overflows (CSOs), which also contribute to the impairment of Indiana's waters.

Reduction of impairments is critical for the protection of Indiana's public water supply systems (PWSSs). IDEM has assessed most of Indiana's PWSSs to inventory potential contaminants and determine water system susceptibility to contamination. IDEM works with PWSSs to help them understand the assessment information and develop and implement plans to protect drinking water sources and maintain compliance to ensure safe water is delivered to the public.

IDEM's Office of Water Quality (OWQ) is committed to meeting its obligations outlined within this agreement. OWQ is working to identify additional resources necessary to meet those commitments, including trade-offs that may result in discussions during the execution of this agreement.

Outlook

Indiana, in partnership with U.S. EPA R5 and other stakeholders, can be proud of its environmental record, but must be ready for continuing challenges. This agreement, addressing near-term focus points and program specific elements and corresponding work plans, is designed to outline those commitments. The outcomes are intended to improve environmental conditions in the State of Indiana and provide a mechanism to track the improvement.

Work Plans for Joint Priorities and Program Goals and Objectives

Office of Air Quality (OAQ)

While U.S. EPA R5 has established goals for each objective, the tasks covered do not always encompass all phases of the goal. For example, many objectives are listed under the goal “Taking action on climate change and improving air quality.” In many cases the actual tasks do not cover any activities related to climate change.

Title V Operating Permits (TVOPs) and Prevention of			A-1
IDEM Contact(s): Matt Stuckey	U.S. EPA R5 Contact(s): Genevieve Damico	Due Date: Ongoing	
U.S. EPA R5 Role: Provide program assistance.			
Goal 1:	Taking action on climate change and improving air quality.		
Objective 1.1:	Address climate change.		
Objective 1.2:	Improve air quality.		
Funding:	State fees for Title V; and U.S. EPA R5 with state match for PSD/NA NSR programs.		

Issue all TVOPs and PSD/NA NSR permits in a timely manner consistent with federal and state requirements:

- a) Track progress of all TVOP applications received by IDEM.

Status:

- b) Timely issuance of all TVOPs – IDEM will ensure progress is made on all pending initial TVOP applications.

Status:

- c) Timely issuance of all TVOP renewals – IDEM will ensure progress is made on all pending TVOP renewal applications so that these renewals are issued prior to the expiration of their current TVOP, or so that late applications are issued within nine (9) months of receipt of the application.

Status:

- d) IDEM will provide semi-annual updates to the Title V Operating Permit System (TOPS) database by January 31 and July 31 of each year.

Status:

- e) Provide quarterly updates to the Reasonably Available Control Technology/Best Available Control Technology/Lowest Achievable Emission Rate (RACT/BACT/LAER) Clearinghouse (RBLC) for each PSD/NA NSR permit issued.

Status:

- f) IDEM will identify issues and U.S. EPA R5 will provide program assistance for TVOPs, PSD/NA NSR permits, and synthetic minor permits as necessary.

Status:

- g) Participate with U.S. EPA R5 in a permit program evaluation in FY16.

Status:

Compliance Monitoring Strategy (CMS) for Title V and Federally Enforceable State Operating Permit (FESOP) A-2		
IDEM Contact(s): Phil Perry	U.S. EPA R5 Contact(s): Nathan Frank, Debra Flowers, and Rochelle Marceillars	Due Date: September 30, 2017
U.S. EPA R5 Role: Review Clean Air Act Stationary Source Compliance Monitoring Strategy (CMS) Policy and work closely with OAQ staff to ensure any issues are satisfactorily addressed.		
Goal 5:	Enforcing environmental laws.	
Objective 5.1:	Enforce environmental laws.	
Funding:	Dedicated Title V Fund	

Develop and implement the Clean Air Act Stationary Source Compliance Monitoring Strategy (CMS) Plan for Title V and Federally Enforceable State Operating Permitted (FESOP) source inspections and compliance evaluations consistent with the Clean Air Act Stationary Source Compliance Monitoring Strategy, July 2014.

- a) Submit CMS Plan for review and negotiation with U.S. EPA R5 by August 31, 2015 for FY16, and August 31, 2016 for FY17. Implementation of the final CMS Plan for FY 16 will begin on October 1, 2015 and on October 1, 2016 for FY17. The CMS Plan will meet The Clean Air Act Stationary Source Compliance Monitoring Strategy, July 2014 policy. The CMS source category and frequency flags will be completed by IDEM for the Title V major and synthetic minor with the potential to emit at or above 80% major source threshold (SM80) source universe in the Integrated Compliance Information System - Air (ICIS-Air) by November 30, 2015, for FY16 and November 30, 2016, for FY17.

Status:

- b) U.S. EPA R5 shall submit a written response to IDEM concerning the CMS plan by December 31, 2015, for FY16 and December 31, 2016, for FY17.

Status:

- c) Implement the CMS plan for full compliance evaluations:
- Conduct full compliance evaluations of Part 70 sources once every two (2) years, except mega-sites, gas compressor stations and gas turbines facilities.
 - Mega-sites will be identified in the CMS plan and a full compliance evaluation of those sites will be conducted once every three (3) years.
 - Gas compressor stations and gas turbines facilities will be identified in the CMS plan and full compliance evaluations of those sites will be conducted once every five (5) years.
 - Conduct full compliance evaluations of all FESOP sources once every five (5) years, except as noted in the CMS.

- In those years where full compliance evaluations are not conducted, partial compliance evaluations will be completed, including review of annual compliance certifications, review of quarterly deviation reports, review of emergency reports and review of the various emissions reports.

Status:

- d) Submit compliance and enforcement information within the standards required for reporting per The Clean Air Act Stationary Source Compliance Monitoring Strategy, July 14, 2014 (CMS), The Clean Air Act National Stack Testing Guidance, April 27, 2009, Timely and Appropriate Enforcement Response to High Priority Violations - Revised 2014 (HPV policy), The Guidance on Federal Reportable Violations for Clean Air Act Stationary Sources – September 2014 (FRV policy), and the current Information Collection Request (ICR) for ICIS-Air. Ensure data is complete, accurate, timely, and that data is consistent with U.S. EPA policies and guidance.

Status:

- e) Respond to complaints, including those referred from U.S. EPA R5. Inspections are conducted where necessary.

Status:

- f) U.S. EPA R5 will provide compliance and enforcement support and guidance and make training available to IDEM staff, as needed.

Status:

- g) Prepare enforcement cases according to IDEM's Compliance and Enforcement Response Nonrule Policy (CERP) and guidance, and U.S. EPA's Timely and Appropriate Enforcement Response to High Priority Violations (HPV policy) – Revised 2014. IDEM will review findings and prepare enforcement cases according to the HPV Policy, IDEM CERP and guidance, and the IDEM Civil Penalty Nonrule Policy for noncompliance with statutes, rules or permits.

Status:

- h) Participate in enforcement/settlement negotiation conferences and follow-up on the requirements of IDEM's Agreed and/or Commissioner's Order.

Status:

- i) U.S. EPA R5 and IDEM will conduct monthly conference calls to discuss planning, program progress, compliance and enforcement issues, HPVs, data management and reporting, and efforts to resolve violations. U.S. EPA R5 and IDEM will have initial case-specific consultations to discuss case development and resolution timeframes for state lead HPV cases not addressed within 180 days from the Day Zero. Any data issues will also be discussed on these monthly conference calls.

Status:

- j) IDEM will track and update U.S. EPA R5 on a quarterly basis on the recommendations made from the Round 4 State Review Framework until completion.

Status:

Compliance Monitoring Strategy (CMS) for Asbestos			A-3
IDEM Contact(s): Phil Perry & Dan Stamatkin	U.S. EPA R5 Contact(s): Nathan Frank, Debra Flowers, and Rochelle Marceillars	Due Date: September 30, 2017	
U.S. EPA R5 Role: Provide program assistance as requested.			
Goal 5:	Enforcing environmental laws.		
Objective 5.1:	Enforce environmental laws.		
Funding:	Dedicated – Asbestos Trust		

Implement a compliance and enforcement program for asbestos inspections and compliance evaluation of asbestos notifications, licensed asbestos contractors, and stationary asbestos sources.

- a) Submit an annual report to U.S. EPA R5 on asbestos demolition/renovation notifications submitted by the owner/operator, compliance evaluations conducted, and enforcement actions initiated by IDEM. The report will be submitted by October 31, 2015, for FY16 and by October 31, 2016, for FY17. The report will be submitted alphabetically by owner/operator and will include the number of asbestos demolition/renovation notifications received, warning letters, Notice of Violations (NOVs), Referrals, Agreed Orders, State Court Orders/Decrees, and penalties assessed.

Status:

Conduct Ambient Air Quality Monitoring Throughout Indiana			A-4
IDEM Contact(s): Richard Zeiler & Steve Lengerich	U.S. EPA R5 Contact(s): Michael Compher	Due Date: Ongoing	
U.S. EPA R5 Role: Regulatory advice, funding and review.			
Goal 1:	Taking action on climate change and improving air quality.		
Objective 1.2:	Improve air quality.		
Funding:	PPG		

- a) Operate monitors for National Ambient Air Quality Standards (NAAQS) pollutants and Photochemical Assessment Monitoring Stations (PAMS) according to 40 CFR 58, approved monitoring plans, and the quality management plan/quality assurance project plans (QMP/QAPPS).

Status:

- b) Submit annual network plan required by 40 CFR 58.10 by July 1 of the prior year, unless another schedule has been approved by U.S. EPA R5.

Status:

- c) Maintain certification lab operation by the continued use of the most current lab standards, and continued use of state-of-the-art techniques to produce the most accurate certifications possible.

Status:

- d) Investigate new analytical methods of testing through new equipment.

Status:

- e) Provide for (or participate in) adequate, independent quality assurance audits for the monitoring activities supported by this grant, including Pb Performance Evaluation Program (Pb-PEP) and National Performance Audit Program (NPAP).
- f) Operate, evaluate and improve monitoring procedures and data reporting of the Photochemical Analytical Monitoring Strategy (PAMS) monitoring in Northwest Indiana.

Status:

- g) Continue to use the Interagency Monitoring of Protected Visual Environments (IMPROVE)-style carbon samplers at PM_{2.5} speciation trends and supplemental sites.

Status:

- h) Continue to operate the source and population-oriented monitors for the revised Lead (Pb) standard.

Status:

- i) Continue to operate NCore site in Indianapolis.

Status:

- j) Assist industry with the siting of any new NAAQS stations, as required for SO₂ source-oriented monitoring.

Status:

- k) Continue to operate the near-roadway monitoring station for NO₂ and associated parameters as required.

Status:

- l) Participate in U.S. EPA's Technical System Audits and timely develop a corrective action plan, address findings, and provide documentation or verification or completed corrective actions.

Status:

- m) Submit 5-year network assessments required by 40 CFR part 58.10(d).

Status:

- n) Submit certification to U.S. EPA R5 each year that:
 - a. Confirms IDEM's QMP is still in effect.
 - b. Identifies needed revisions to the QMP.
 - c. Identifies all QAPPs encompassed by the agencies QMP.

Status:

- o) Commit funds to adequately support the monitoring program.

Status:

p) Coordinate and oversee work performed by contractors or other organizations.

Status:

q) U.S. EPA R5 will provide regulatory advice, funding and review.

Status:

Air Toxics Monitoring, Risk Analysis and Reduction		A-5
IDEM Contact(s): Richard Zeiler & Steve Lengerich	U.S. EPA R5 Contact(s): Michael Compher, Motria Caudill & Rae Trine	Due Date: Ongoing
U.S. EPA R5 Role: Risk assessment and data analysis advice, special grant funding and review. Collaborate with IDEM as appropriate to evaluate and mitigate localized air toxics.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

Conduct effective non-criteria pollutant monitoring.

a) Maintain Indiana Air Toxic Monitoring Program.

Status:

b) U.S. EPA R5 will provide risk assessment and data analysis advice, inform IDEM of special grant funding and review, and collaborate with IDEM, as appropriate, to evaluate and mitigate localized air toxics.

Status:

Make Air Monitoring Information Publicly Available		A-6
IDEM Contact(s): Richard Zeiler & Steve Lengerich	U.S. EPA R5 Contact(s): Michael Compher	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

Continue to assess and modify Indiana's air monitoring program and make monitoring information available to the public.

a) Perform a quality assurance (QA) network evaluation.

Status:

b) Conduct data analysis to determine improvement and degradation of air quality.

Status:

c) Perform annual industry evaluations (systems audit). Provide information to U.S. EPA R5.

Status:

d) Annually review and update the OAQ Quality Assurance Manual.

Status:

e) Submit ambient concentration and quality assurance data to Air Quality System (AQS), according to schedule in 40 CFR 58.

Status:

- f) Produce daily and hourly ozone and PM_{2.5} data and maps to be posted on the Internet, as per U.S. EPA HQ Ozone and PM_{2.5} Mapping Projects.

Status:

- g) Maintain air quality index (AQI) reporting in designated cities.

Status:

- h) Certify all parameters required under 40 CFR part 58.15 according to the schedule in that part.

Status:

- i) Submit ozone, PM_{2.5} and meteorological data to AIRNow.

Status:

- j) U.S. EPA R5 will provide timely advice and reviews.

Status:

Leading Environmental Analysis and Display System (LEADS ®)		A-7
IDEM Contact(s): Richard Zeiler & James Parks	U.S. EPA R5 Contact(s): Michael Compher	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

Collect real time air quality information using LEADS ®.

- a) Maintain automatic calibration equipment at all continuous monitoring sites.

Status:

- b) Deploy LEADS® at all newly established continuous monitoring site locations.

Status:

- c) Provide current data from all active continuous monitoring sites to the public via the agency website.

Status:

- d) Provide past data from active continuous monitoring sites and past data from recently discontinued sites.

Status:

- e) U.S. EPA R5 will provide timely advice and reviews.

Status:

Persistent Bioaccumulative Toxics Great Lakes Air Deposition		A-8
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Erin Newman	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice, adequate funding, and timely reviews.		
Goal 1:	Taking action on climate change and improving air quality.	

Objective 1.2:	Improve air quality.
Funding:	PPG

IDEM will undertake activities to evaluate persistent bioaccumulative toxics (PBTs).

- a) IDEM will post a request for proposals for projects to evaluate persistent bioaccumulative toxics in Indiana. Projects can include research, monitoring, data evaluation, and any other activities that will further knowledge concerning PBTs in Indiana.

Status:

- b) IDEM will use staff time to identify and quantify source types and emissions that contribute PBTs to lakes through atmospheric deposition to better address PBTs.

Status:

- c) U.S. EPA R5 will provide timely advice and reviews.

Status:

Implementation of 2008 Ozone National Ambient Air Quality Standards (NAAQS)			A-9
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Doug Aburano	Due Date: Ongoing	
U.S. EPA R5 Role: Timely advice and reviews.			
Goal 1:	Taking action on climate change and improving air quality.		
Objective 1.2:	Improve air quality.		
Funding:	PPG		

Successfully implement the 2008 Ozone National Ambient Air Quality Standards (NAAQS).

- a) Monitor attainment status for areas designated nonattainment.

Status:

- b) Develop and submit attainment and rate of progress State Implementation Plans (SIPs), if necessary.

Status

- c) Submit ozone designation recommendations within one year from pending ozone standard being finalized.

Status:

- d) U.S. EPA R5 will provide timely advice and reviews.

Status:

SO ₂ National Ambient Air Quality Standards (NAAQS)		A-10
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Doug Aburano	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

- a) Submit designations recommendations for five specified power plants by September 2015.

Status:

- b) Implement the data requirements rule upon final release. This includes overseeing the deployment of monitoring or modeling on a case by cases basis.

Status:

- c) Complete designation processes as necessary based on monitoring and modeling outcomes.

Status:

- d) Prepare and submit attainment SIPs as necessary.

Status:

- e) Monitor attainment status for areas designated nonattainment.

Status:

- f) U.S. EPA R5 will provide timely advice and reviews.

Status:

Redesignation Petitions and Maintenance Plans		A-11
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Doug Aburano and Pam Blakley	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

- a) Prepare and submit redesignation petitions and maintenance plans within six (6) months of monitoring data being quality assured for each new area that attains an NAAQS.

Status:

- b) Develop and submit attainment SIPs as necessary.

Status:

- c) U.S. EPA R5 will provide timely advice and reviews.

Status:

Regional Haze		A-12
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Doug Aburano	Due Date: January 2016
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

- a) Coordinate through the Lake Michigan Air Directors Consortium to prepare and submit a five (5) year progress report on the Regional Haze SIP.

Status:

- b) U.S. EPA R5 will provide timely advice and reviews.

Status:

Implementation of 2012 PM2.5 National Ambient Air Quality Standards (NAAQS)			A-13
IDEM Contact(s): Scott Deloney	U.S. EPA R5 Contact(s): Doug Aburano	Due Date: Ongoing	
U.S. EPA R5 Role: Timely advice and reviews.			
Goal 1:	Taking action on climate change and improving air quality.		
Objective 1.2:	Improve air quality.		
Funding:	PPG		

- a) Submit infrastructure SIP for 2012 PM2.5 NAAQS.

Status:

Transportation Conformity		A-14
IDEM Contact(s): Shawn Seals	U.S. EPA R5 Contact(s): Pamela Blakley, Francisco Acevedo, Anthony Maietta	Due Date: Ongoing
U.S. EPA R5 Role: Timely advice and reviews.		
Goal 1:	Taking action on climate change and improving air quality.	
Objective 1.2:	Improve air quality.	
Funding:	PPG	

- a) Work with local Metropolitan Planning Organizations, EPA, and state and federal transportation agencies in future conformity determinations, as needed.

Status:

- b) Work with transportation agencies as appropriate to update mobile SIP budgets in response to changing needs such as updates to the mobile model MOVES or other changes.

Status:

Resource Conservation Recovery Act (RCRA) Corrective Action (CA)			L-1
IDEM Contact(s): Vic Windle & Mike Sickels	U.S. EPA R5 Contact(s): Mike Beedle & Tammy Moore	Due Date: See below	
U.S. EPA R5 Role: Contractor support for sampling and risk review at selected sites.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

Office of Land Quality (OLQ)

IDEM supports U.S. EPA R5's Integrated Cleanup Initiative to improve the accountability, transparency, and effectiveness of all of our cleanup programs. IDEM will coordinate the activities of its RCRA CA, Leaking Underground Storage Tanks, Brownfields, Toxic Substances Control Act, and Superfund programs to reduce risks to human health and the environment, by assessing and cleaning up contaminated sites to appropriate land use based levels, and put them back into productive use.

In support of our coordinated efforts, IDEM will meet the requirements of the Resource Conservation and Recovery Act (RCRA) Government Performance and Results Act (GPRA).

- a) For the 2020 Universe facilities, of which 80 are assigned for state lead, IDEM will achieve the following GPRA corrective action goals:
- By September 30, 2015: 68 facilities will reach CA725, 64 facilities will reach CA750, and 54 facilities will reach CA550 and 18 facilities will reach CA900/999. IDEM will strive to enter all event codes into RCRAInfo by September 1, 2015.
 - By September 30, 2016: 69 facilities will reach CA725, 66 facilities will reach CA750, and 54 facilities will reach CA550 and 20 facilities will reach CA900/999. IDEM will strive to enter all event codes into RCRAInfo by September 1, 2016.
 - By September 30, 2015: IDEM and U.S. EPA will have negotiated CA targets for federal fiscal year 2017.

Status:

Hazardous Waste Permitting and Post-Closure			L-2
IDEM Contact(s): Vic Windle	U.S. EPA R5 Contact(s): Jae Lee	Due Date: September 30, 2015 & September 30, 2016	
U.S. EPA R5 Role: Provide program assistance.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

Permit priority will be given to application submittals that are subject to Indiana's permit accountability statute. U.S. EPA R5 is in the process of developing 2015-2017 permit and renewal baselines. The baselines will be completed by the end of June 2015.

- a) Issue permit renewals to 100% of the 2015-2017 baseline facilities within six (6) months of expiration.

Status:

- b) Upon request, U.S. EPA R5 will provide timely boiler and industrial furnaces (BIF) and risk assessment assistance to complete hazardous waste facility permitting actions in accordance with U.S. EPA Government Performance and Results Act (GPRA) goals.

Status:

Resource Conservation and Recovery Act (RCRA) Hazardous Waste Inspections of Generators			L-3
IDEM Contact(s): Susan Lowry	U.S. EPA R5 Contact(s): Gary Victorine	Due Date: July 1, 2015-June 30, 2017	
U.S. EPA R5 Role: Conduct inspections of at least six large quantity generators (LQGs). Inspect other facilities handling hazardous waste as necessary. Criteria for U.S. EPA's selection of installations may include: (a) requests from IDEM, (b) installations subject to open federal enforcement judicial and/or administrative decrees/orders, (c) installations that have not been inspected in the past, and (d) installations under Regional and National priority sectors and/or initiatives.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

- a) Each state fiscal year, IDEM will, by June 30 of that respective year, conduct Compliance Evaluation Inspections (CEIs) at a minimum of 20% of the large quantity generator (LQG) universe that exists in the RCRAInfo database. The universe will be determined using data that exists in the RCRAInfo database as of June 1 of that respective year.

Status:

- b) U.S. EPA R5 will conduct inspections of at least six (6) large quantity generators (LQGs). U.S. EPA R5 will inspect other facilities handling hazardous waste as necessary. Criteria for U.S. EPA R5's selection of installations may include: (a) requests from IDEM, (b) installations subject to open federal enforcement judicial and/or administrative decrees/orders, (c) installations that have not been inspected in the past, and (d) installations under regional and national priority sectors and/or initiatives.

Status:

Resource Conservation and Recovery Act (RCRA) Hazardous Waste Inspections of Treatment, Storage and Disposal Facilities (TSDs)			L-4
IDEM Contact(s): Susan Lowry	U.S. EPA R5 Contact(s): Gary Victorine	Due Date: July 1, 2015-June 30, 2017	
U.S. EPA R5 Role: U.S. EPA R5 will independently inspect at least two additional operating TSDs for all permit requirements for each year. U.S. EPA R5 will perform annual inspections at all operating TSDs owned or operated by state and local governments.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

- a) Each fiscal year, IDEM will inspect 50% of all Treatment, Storage and Disposal facilities (TSDs) with a current operating permit for active permitted units.

Status:

- b) U.S. EPA R5 will independently inspect at least two (2) operating TSDs for all permit requirements for each year. U.S. EPA R5 will perform annual inspections at all operating TSDs owned or operated by state and local governments.

Status:

Resource Conservation and Recovery Act (RCRA) Hazardous Waste Enforcement			L-5
IDEM Contact(s): Nancy Johnston	U.S. EPA R5 Contact(s): Todd Brown	Due Date: July 1, 2015-June 30, 2017	
U.S. EPA R5 Role: Issue enforcement responses to RCRA violations detected by U.S. EPA R5, or referred to U.S. EPA R5 by IDEM, in accordance with U.S. EPA's 2003 Hazardous Waste Civil Enforcement Response Policy, U.S. EPA's RCRA Civil Penalty Policy and relevant U.S. EPA enforcement strategies.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

- a) Issue enforcement responses to RCRA violations in accordance with IDEM's enforcement response strategy and U.S. EPA HQ's 2003 Hazardous Waste Civil Enforcement Response Policy.

Status:

- b) U.S. EPA R5 will issue enforcement responses to RCRA violations detected by U.S. EPA R5 or referred to U.S. EPA R5 by IDEM, in accordance with enforcement strategies.

Status:

Polychlorinated Biphenyl (PCB) Inspections			L-6
IDEM Contact(s): Theresa Bordenkecher	U.S. EPA R5 Contact(s): Kendall Moore	Due Date: July 1, 2015-June 30, 2017	
U.S. EPA R5 Role: Review IDEM's PCB inspection reports and, if necessary, issue the appropriate enforcement response. Provide technical assistance and guidance on federal PCB regulations. Conduct mid-year and year end reviews. Provide continuing refresher training to experienced inspectors and basic field investigation training to new inspectors. Provide enforcement training to allow IDEM to prepare penalty calculations.			
Goal 4:	Ensuring the safety of chemicals and preventing pollution.		
Objective 4.1:	Ensure chemical safety.		
Funding:	PPG		

- a) Conduct 24 Toxic Substance Control Act (TSCA) PCB inspections for FY16 and 24 PCB inspections for FY17.

Status:

- b) Work with U.S. EPA R5 on oversight of PCB cleanups and provide technical assistance to the regulated community. Provide a yearly summary report detailing the status of oversight activities for each fiscal year.

Status:

- c) Work with the U.S. EPA R5 Pesticides and Toxics Compliance Section (PTCS) in the annual targeting of facilities for TSCA PCB inspections, including critical points within natural gas pipeline transmission and distribution systems.

Status:

- d) IDEM will provide a quarterly inspection summary.

Status:

- e) U.S. EPA R5 will review IDEM's PCB inspection reports and, if necessary, issue the appropriate enforcement response, provide technical assistance and guidance on federal PCB regulations, conduct mid-year and year end reviews, provide continuing refresher training to experienced inspectors and basic field investigation training to new inspectors, and provide enforcement training to allow IDEM to prepare penalty calculations.

Status:

Resource Conservation Recovery Act (RCRA) RCRAInfo		L-7
IDEM Contact(s): Greg Overtom	U.S. EPA R5 Contact(s): Darnell L. Wilson	Due Date: Monthly
U.S. EPA R5 Role: Provide program assistance.		
Goal 4:	Ensuring the safety of chemicals and preventing pollution.	
Objective 4.1:	Ensure chemical safety.	
Funding:	PPG	

Resource Conservation and Recovery Act (RCRA) information will be input into the RCRAInfo database on a monthly basis until the RCRAInfo data flows are put into production.

- a) IDEM will transfer the data and tracking functions from the Indiana RCRA Activities Tracking System (IRATS) into the agency's Environmental Information System (EIS) by the end of the second quarter of 2016. Once fully integrated, the EIS will be used to track all RCRA related regulatory activities and IRATS will be decommissioned.

Status:

- b) IDEM will develop Exchange Network data flows for all RCRAInfo schemas by September 2015. It should be noted that production data will not be available in our EIS or in the data flows until the first or second quarter of 2016.

Status:

- c) IDEM will collect Biennial Reports for the 2015 cycle using EasiTrak software.

Status:

- d) U.S. EPA R5 will provide program assistance for all data cleanup within RCRAInfo as needed. This includes all the modules within the national database.

Status:

Rule Development		L-8
IDEM Contact(s): Chris Pedersen	U.S. EPA R5 Contact(s): Mary Setnicar	Due Date: June 30, 2017
U.S. EPA R5 Role: Many rule updates are promulgated by U.S. EPA R5 and IDEM in mutually agreed upon time frames. Regarding the Research, Development and Demonstration (RDD) rule, U.S. EPA R5 will provide assistance where applicable.		
Goal 5:	Enforcing environmental law.	
Objective 5.1:	Enforce environmental law.	
Funding:	PPG	

Develop equivalent legislation, regulations and program revision applications for RCRA and hazardous and solid waste amendments (HSWA) / non-HSWA provisions for which

the state is prepared to seek authorization. Submit current and future authorization packages within a mutually agreed upon time frame.

- a) IDEM will promulgate and pursue authorization for all RCRA Subtitle C annually and Subtitle I rules, as needed.

Status:

- b) U.S. EPA R5 will provide assistance where applicable regarding the Research, Development and Demonstration (RDD) rule.

Status:

Concentrated Animal Feeding Operations (CAFO) NPDES Permits & Enforcement			L-9
IDEM Contact(s): Charles Grady & Joseph Williams	U.S. EPA R5 Contact(s): Ryan Bahr & Julianne Socha	Due Date: June 30, 2016 & June 30, 2017	
U.S. EPA R5 Role (Water Division): Provide training on conducting CAFO inspections to IDEM staff, as requested. U.S. EPA R5 will be leading on enforcement where there is non-compliance with existing federal orders or where non-compliance is documented through a federal lead inspection.			
Goal 3:	Cleaning up communities and advancing sustainable development.		
Objective 3.2:	Preserve land.		
Funding:	PPG		

- a) Conduct compliance inspections at 20% of all CAFOs each fiscal year. There are currently 1,827 animal feeding operations permitted in Indiana. These include 701 concentrated animal feeding operations (CAFOs) and 1,126 smaller operations called confined feeding operations (CFOs). In addition to routinely inspecting 20% of the permitted CAFOs, inspections are also conducted in the categories listed below to determine whether facilities discharge or should be designated a CAFO.

- State regulated large and medium CAFOs with an NPDES permit.
- State regulated large CAFOs without an NPDES permit.
- State regulated medium AFOs without an NPDES permit.
- Small AFOs without an NPDES permit.

Status:

- b) Issue NPDES permits to 100% of the CAFO Individual NPDES permit holders by September 30, 2015, whose expiration dates are on or before September 30, 2015.

Status:

- c) U.S. EPA R5 will provide training on conducting CAFO inspections to IDEM staff, as requested. U.S. EPA R5 will be the lead on enforcement where there is non-compliance with existing federal orders or where non-compliance is documented through a federal lead inspection.

Status:

Office of Water Quality (OWQ)

Impaired Waters List and Water Quality Report	W-1
--	------------

IDEM Contact(s): a) Marylou Renshaw & Jody Arthur		U.S. EPA R5 Contact(s): Mathew Gluckman & Vilma Rivera-Carrero	Due Date: a) April 1, 2016
U.S. EPA R5 Role: Timely review and comment on materials submitted. Provide guidance on report/list development. Provide continued support and guidance on the use of the Assessment Database.			
Goal 2	Protecting America's waters.		
Objective 2.2:	Protect and restore watersheds and aquatic eco-systems.		
Funding:	PPG		

- a) Use the Assessment Database (ADB) to submit the Integrated Report (IR), including 303(d) List of Impaired Waterways by established deadlines. Complete quality assurance of information in ADB to ensure consistency with 303(d) list and other IR categories. Provide additional IR information (e.g., assessment methodology, GIS files) in other appropriate formats, as required by the IR Guidance (U.S. EPA WQ-7).

Status:

- b) U.S. EPA R5 will provide timely review and comments on materials submitted, guidance on report/list development, and support and guidance on the use of the ADB.

Status:

Total Maximum Daily Loads (TMDLs)			W-2
IDEM Contact(s): a) & c) Marylou Renshaw & Bonny Elifritz b) Marylou Renshaw & Cyndi Wagner		U.S. EPA R5 Contact(s): a) Peter Swenson b) David Werbach	Due Date: a) September 30, 2015 & 2016 b) December 31, 2015 & 2016
U.S. EPA R5 Role: Timely review and comment, and contractor assistance, and provide guidance/other information on identifying causes/sources of impairment.			
Goal 2	Protecting America's waters.		
Objective 2.2:	Protect and restore watersheds and aquatic eco-systems.		
Funding:	State		

- a) TMDLs will be developed in accordance with the measures established by U.S. EPA R5 and U.S. EPA Headquarters' 303(d) Vision process for prioritizing and implementing the TMDL Program. IDEM must establish priorities and commit to meeting those priorities. IDEM will submit at least one watershed TMDL project each year. The number of segments/TMDLs will depend upon the watershed. For FFY15, IDEM will submit the Southern Whitewater TMDL and the Upper Mississinewa TMDL if there is time to finalize the assessments and conduct the public process. If the Upper Mississinewa TMDL is not complete for FFY15, it will be submitted in early FFY16 followed later that year by the South Fork blue river TMDL.

Status:

- b) Targeted Monitoring Studies - Monitor waters to provide information on sources and causes of impairments for use in the development of TMDLs and/or watershed plans. IDEM commits to at least one (1) watershed characterization study a year.

Status:

- c) U.S. EPA R5 will provide timely review, comments, contractor assistance and will provide guidance or other information on identifying causes/sources of impairment.

Status:

Wetland and Stream Impacts and Storm Water Permits		W-3
IDEM Contact(s): Randy Braun	U.S. EPA R5 Contact(s): a) Peter Swenson b) Brian Bell	Due Date: Ongoing
U.S. EPA R5 Role: Provide program assistance.		
Goal 2	Protecting America's waters.	
Objective 2.2:	Protect and restore watersheds and aquatic eco-systems.	
Funding:	Federal/State (Wetlands Mapping Impacts Grant)	

- a) Review applications and issue appropriate permits for wetland and stream impacts.

Status:

- b) Storm water permits – Review applications and issue appropriate permits for construction, municipal and industrial discharges of storm water.

Status:

- c) U.S. EPA R5 will provide program assistance.

Status:

Office of Water Quality (OWQ) Permits		W-4
IDEM Contact(s): a) Paul Higginbotham & Jerry Dittmer b) Paul Higginbotham & Stan Rigney	U.S. EPA R5 Contact(s): a) Kevin Pierard b) Kevin Pierard	Due Date: See below
U.S. EPA R5 Role: Provide timely review, technical assistance and comment and identify issues at an early stage in the process.		
Goal 2	Protecting America's waters.	
Objective 2.1:	Protect human health.	
Funding:	State	

- a) Municipal National Pollutant Discharge Elimination System (NPDES) Permits – Issue 95% of all identified priority NPDES permits, issue new permits within statutory time frames.

- Issue municipal priority permits within requested time frames.

Status:

- Maintain the backlog of municipal permits at 10% or less.

Status:

- Issue new municipal NPDES permits within statutory time frames.

Status:

- U.S. EPA R5 will review NPDES discharge permits greater than 5 million gallons per day (MGD) in the Lake Michigan basin and NPDES discharge permits greater than 1 million gallons per day (MGD) that directly discharge to Lake Michigan.

Status:

- b) Industrial NPDES permits – Issue 95% of all identified priority NPDES permits and issue new permits within statutory time frames.

- Issue industrial priority permits within requested time frames.

Status:

- Maintain the backlog of industrial permits at 10% or less.

Status:

- Issue new industrial NPDES permits within statutory time frames.

Status:

- U.S. EPA R5 will review permits previously identified for review, all general permits and individual permits for the major dischargers are listed below. U.S. EPA R5 will provide a non-objection letter once any objectionable issues U.S. EPA R5 raised have been resolved. IDEM and U.S. EPA R5 will evaluate the list annually (e.g. FY15 midterm adjustment) to identify additional permits for U.S. EPA R5 to review based on national and regional priorities and/or permits to remove from the list.

Status:

- c) U.S. EPA R5 will provide timely review, technical assistance, comments, and identify issues at an early stage in the process.

Status:

- d) By November 1, 2015, IDEM shall develop and submit a workplan for converting general permits-by-rule to administratively-issued general permits.
- The workplan shall include a schedule for issuing all general permits identified for conversion.
 - IDEM will coordinate the issuance of the general permits with the General Permit rulemaking to ensure all current permittees retain coverage.
 - U.S. EPA R5 will continue to work expeditiously to review the draft general permit language and once U.S. EPA R5 agrees, U.S. EPA R5 will issue a non-objection letter so IDEM can proceed with the public notice of the draft permit and subsequently the issuance of the final permit consistent with the MOA. U.S. EPA R5 has reviewed and provided such non-objection letters for five draft general permits.

Status:

Compliance Monitoring Strategy (CMS) for Wet Weather Programs, Combined Sewer Overflow (CSO) Long Term Control Plans (LTCP), Sanitary Sewer Overflow (SSO) and Storm Water		W-5
IDEM Contact(s): a) & b) Paul Higginbotham & Jerry Dittmer c) Mark Stanifer, d), e), f) & g) & Randy Braun	U.S. EPA R5 Contact(s): Kevin Pierard & Ryan Bahr	Due Date: See below
U.S. EPA R5 Role: U.S. EPA R5 will be the lead on certain environmentally significant CSO communities, working in partnership with IDEM to reach agreement on approvable long-term control plans and implementation schedules. U.S. EPA R5 will provide timely review and comment on technical non-rule policy and other documents submitted by IDEM.		
Goal 5:	Enforcing environmental laws.	
Objective 5.1:	Enforce environmental laws.	
Funding:	State	

Implement the alternative CMS plan for National Wet Weather Priorities. CAFO inspections will be conducted by the Office of Land Quality (see L-9).

- a) IDEM will participate in the review and approval of the long term control plans (LTCPs) and Consent Decree issues in CSO cases under federal lead, including Evansville, Gary, and Hammond (U.S. EPA PAM [SS-1]).

Status:

- b) IDEM will continue LTCP compliance implementation by (U.S. EPA PAM [SS-1]):
- Monitoring milestone dates in the LTCP through site visits and review of documentation.
 - Monitoring compliance with limits (as applicable) through review of submitted monitoring reports.
 - Reviewing periodically the approved LTCPs.
 - Setting meetings (as needed) with communities and their consultants on the status of the implementation of the LTCPs.

Indiana has 72 major and 37 minor CSO communities. The 2014 CMS inspection frequency is to inspect all facilities every 5 years. In Indiana, that corresponds to approximately 15 major and 7 minor inspections, or 22 total each year. However, this is an unrealistic number of annual inspections due to the number of dedicated CSO Project Managers (3). In Indiana, 106 of the 109 communities have approved Long Term Control Plans in place. Based on the fact that the majority of CSO communities are now implementing approved LTCPs, IDEM is transitioning its CSO Wet Weather Program and existing staff (3 Full-time Equivalents, FTEs) from LTCP development to LTCP implementation and compliance monitoring/tracking. Due to the limited staff resources, IDEM has developed a thorough computer tracking system through the use of the TEMPO Database. This compliance tracking system allows IDEM to get “the biggest bang for the buck” by allowing the majority of compliance tracking to occur and be reported on from the desks of the CSO Project Managers. This allows for the most efficient and effective use of staff time and retains their ability to contact multiple CSO communities on daily basis on potential compliance issues that would not occur if the majority of their time was spent in the field driving between CSO communities, which can be a considerable distance apart. This compliance tracking approach is further enhanced by in the field inspections (CSO Audits) by the CSO Project Managers, as well CSO DMR and MRO reviews (also done in the office) as part of our compliance monitoring strategy. The compliance tracking systems capabilities are now fully developed and in operation to track and report on all CSO LTCP implementation milestones as well as to maintain other valuable information related to each community. At a minimum, reports are run from this system on a monthly basis to determine if any CSO community is behind on any milestone task. These compliance tracking reports are utilized by the CSO Project Managers to prioritize their work in addressing items of non-compliance that are found. This work could be in the form of: informal phone calls to communities; formal written correspondence with response requested; community identified for a CSO Audit; and/or referral for enforcement. It should also be noted that in addition to the work performed by CSO Project Managers, all the CSO communities are covered by routine inspections from dedicated Inspection Section staff that go to all NPDES permitted facilities on a more frequent basis as required by the CMS. The Inspection Section staff coordinates with CSO Project Managers on a routine basis. While the majority of the CSO Project Manager’s time is now spent on compliance monitoring/tracking, they still have to devote time and attention to participating in the remaining Federal CD negotiations to assure that agreed upon LTCPs are developed and approved (Evansville, Gary and Hammond). Given IDEM’s monthly in-office compliance monitoring/tracking approach combined with in the field CSO Audits and routine inspections performed by the Inspection Section, the intent of 22 inspections at CSO communities per year is met and exceeded by IDEM committing to a minimum of 5 CEI level inspections/CSO audits between October 1, 2014 and September 30, 2015 and 8 between October 1, 2015 and September 30, 2016.

Status:

- c) The 2014 CMS policy calls for a minimum inspection frequency of 5% of the Sanitary Sewer Systems (SSS) universe each year. IDEM has 577 permitted SSS which includes POTWs and semi-public facilities. Separately owned satellite collection systems are not included in this inventory. This results in a CMS target of 29 systems per year. SSOs are evaluated as part of NPDES compliance inspections.

Based on the commitments for NPDES compliance inspections (see W-7), IDEM already commits to inspect 289 systems with SSS each year and completes basic evaluations of the performance of these systems. Focused SSO-specific inspections will be scheduled as needed, based on information about overflow occurrences.

Status:

- d) IDEM will administer storm water programs by performing compliance inspections in the following areas: construction/land disturbance and industrial and municipal separate storm sewer systems (MS4s).

Construction/Land Disturbance: IDEM evaluates compliance of construction and land disturbance sites using multiple tools. This is a complex mixture of IDEM site inspections and use of MS4 programs to regulate projects. IDEM inspects permitted construction sites and review storm water pollution prevention plans. IDEM starts by giving the highest importance to those projects for which the agency has received complaints, projects outside MS4s that are greater than five acres, and those project sites owned and/or operated by a MS4. Past experience has shown that small sites (one to two acres) do not require an extensive menu of storm water quality measures to remain in compliance or pose a significant threat to water quality as the larger project sites. IDEM also takes into consideration inspecting smaller sites if they are in an area where multiple smaller projects are within close proximity to one another. The construction site run-off program regulates land disturbing activities of one acre or more. The program is administered state-wide; however the MS4 entities have an active role in regulating projects within their legal jurisdictions. Therefore, an MS4 is the primary entity assessing compliance of projects that occur within their jurisdiction. As part of the administration of the MS4 program, including reviewing annual reports and evaluating implementation of the MCMs over the last few years, IDEM has assessed the overall MS4 program and has identified the MS4s that have strong effective programs and those that may need improvement in administering one or more the MCMs. This internal knowledge of the MS4 program and the compliance status of individual MS4s will allow staff to prioritize which MS4s will be scheduled to further assess the program. IDEM has taken the approach that the MS4 is responsible for local projects. Based on how confident IDEM is that the MS4 is meeting the MCM for construction site run-off, determines how much over site IDEM will impose for sites within that MS4.

Storm water staff is responsible for reviewing storm water pollution prevention plans, conducting MS4 audits for the construction site run-off and post-construction minimum control measures, and inspecting industrial storm water sites. The 2014 CMS target is to inspect 10% of the universe each year. Based on IDEM's estimated universe of 8,200, the commitment would be 820 inspections annually. With only six staff that also have other responsibilities IDEM can conduct 300 inspections per year. However, since over 60% of sites fall with the boundaries of MS4 programs, the actual number of sites inspected by qualified inspectors is much higher than 300. IDEM cannot commit to a specific number of inspections performed by MS4s but between IDEM and MS4 inspections, the overall goal of the CMS program would be met.

In addition to investigating complaints, project sites are prioritized based on those that impact a footprint of five acres or more and that discharge to waters of state or otherwise may have significant impact to water quality. Wetlands Project Managers have also been cross trained and will assess erosion and sediment control compliance when visiting a site to evaluate violations of 401 water Quality Certifications and the Indiana Isolated wetland law.

Storm water staff conducts a limited number of plan reviews and education as part of program goals. Education is a key component of the program to establish expectations for compliance within the regulated community. The plan reviews are selected based on the complexity of the project. For those projects that go through a formal review process, it is evident that deficiencies are identified that upon correction in the plans will avoid compliance issues in the field once the plan is implemented. In addition, the presence of a plan review component establishes an expectation in the regulated community that plans are randomly evaluated and that all requirements of the construction site run-off general permit must be met to avoid possible delays if a plan is found to be deficient.

Status:

Municipal Separate Storm Sewer System (MS4s): The primary methods of assessing compliance are program audits, facility inspections, and compliance meetings. A compliance meeting is a follow-up to an inspection and/or an audit that is conducted to assess progress towards compliance. This element is not counted towards CMS coverage, but an integral part to follow-up with MS4s to bring the entity into compliance. The focused inspections (audit) are conducted in the field and are for the purpose to assess implementation of the storm water quality management plan (SWQMP) and individual minimum control measures (MCMs). Indiana typically will conduct focused inspections (audit) on specific MCMs across the state within a given timeframe for all MS4s. This approach has allowed for more efficient use of staff time and provides a method for the agency to evaluate specific MS4 program components for all MS4 entities within a shorter timeframe. In subsequent years, other MCMs will become the focus for compliance assessment. The focused inspections (audits) are planned and scheduled in advance and compliance meetings and/or inspections may be a follow-up to an audit or an unannounced visit to further assess program compliance.

Indiana has 187 MS4's: 1 Phase I and 186 Phase II. The 2014 CMS minimum goal is to determine compliance of every MS4 every 5 years by way of an on-site audit, an MS4 inspection, or an off-site desk audit. Each MS4 should receive an on-site audit/inspection at least once every 7 years.

As part of the administration of the MS4 program, including reviewing annual reports and evaluating implementation of the MCMs over the last few years, IDEM has assessed the overall MS4 program and has identified the MS4s that have strong effective programs and those that may need improvement in administering one or more the MCMs. This internal knowledge of the MS4 program and the compliance status of individual MS4s will allow staff to prioritize which MS4s will be scheduled to further assess the program. This prioritization will take place based on specific MCMs.

In addition, the entire storm water program participates in educational opportunities to present information to the MS4s. This is achieved through an annual MS4 meeting at which IDEM along with MS4s develop an agenda that is specific to issues and/or program deficiencies that have been identified during the previous year. Compliance issues with a common theme are placed on the agenda as are accomplishments and innovative approaches that a MS4 or group of MS4s has taken to improve their overall program implementation. This is another approach to emphasize expectations and share information to improve the overall performance of MS4s on a statewide basis. In addition to education, IDEM reviews annual reports to assess compliance and aid in identifying the status of a MS4 in administering their program.

Based on this prioritization process, IDEM plans to conduct focused inspections (audit) on specific MCMs across the state. Eighty percent of all MS4s will receive a comprehensive audit of all MCMs; the remainder will receive an audit of the specific MCMs for which IDEM has determined to be deficient or operating at a level below expectations identified in the general permit.

To meet the 7 year goal, IDEM plans to conduct 25 focused inspections (audit) for the Construction and Post-construction MCMs annually. These MCMs include a field based assessment (site inspection and plan review) of how the MS4 administers their regulatory responsibility under the local ordinance. The other MCMs will be scheduled and completed on a seven year cycle based on 60 focused inspections (audit) annually. The MCMs that are selected in a given year will be prioritized by a specific MCM and as necessary may include additional MCMs for which a specific MS4 has not demonstrated compliance. Regardless of which MCM is targeted, staff is aware that the MS4 program is a complex and comprehensive approach to achieve water quality objectives within highly urbanized area and as necessary will make a determination to further investigate any and all program deficiencies that are discovered as part of focused inspection (audit). While this approach achieves water quality objectives that U.S. EPA is seeking, the documentation process does not match up with the standard CMS. However, IDEM feels that over the course of 7 years that this strategy accomplishes the same if not more over site of the program than what is stated in the CMS guidance.

Status:

Industrial Storm Water: The industrial storm water program is administered on a state-wide basis. Indianapolis, the only Phase I MS4 entity, is required to specifically address industrial storm water issues associated with industry. The Phase II entities do not have this requirement. However, the Phase II MS4s are often aware of storm water discharges from industrial sites that are either reported through citizen hotlines or discovered as part of the illicit discharge detection and elimination (IDDE) minimum control measure. Based on these criteria, the MS4 will refer these incidents to the IDEM Storm Water Program to further investigate. In addition, the MS4 may also levy fines based on the local IDDE ordinance. The Office of Land Quality also inspects facilities such as salvage yards and landfills. Many of these facilities also have industrial storm water permits. The Office of Land Quality has trained staff that are familiar with

the storm water regulations and will cite a facility for a storm water violation and/or report the incident to the Storm Water Program to further assess compliance. The number of referrals annually averages 20 to 30 and will either prompt a follow-up inspection, issuance of a compliance letter, or a violation letter based on the severity of the issue identified in the OLQ inspection report. A similar process is in place for inspections conducted by the Office of Water Quality Wastewater inspectors, although their inspections are not focused on storm water issues, it is not uncommon for the Storm Water Program to receive referrals, including photos and observations of the wastewater inspector which allows storm water staff to follow-up with compliance and often collaborate between the two program to pursue compliance.

IDEM does provide training and outreach to operators and organizations that are directly associated with industrial facilities subject to the storm water general permit rule. In addition, the storm water program has coordinated closely with the Compliance Technical Assistance Program (CTAP) of IDEM that meets with industry one on one and also conducts outreach.

Inspections completed by storm water staff will include operating facilities, as well as facilities that have claimed an exemption, and/or facilities that have been the subject of complaints. In addition to complaints, facilities are prioritized for inspections based on referrals from: MS4 entities that may have identified an illicit discharge; the IDEM Office of Land Quality and Office of Water Quality wastewater inspectors based on a facility that was identified to have significant facility management issues related to storm water run-off; facilities that discharge to waters of state or otherwise may have significant impact to water quality (also included are facilities in portions of the state where discharges may be associated with infiltration or discharges to karst), and facilities that have submitted monitoring reports with elevated sampling parameters.

The 2014 CMS includes a goal of inspecting 10% of the universe each year. IDEM has 1600 active permits and 650 No-Exposure exclusions. The CMS annual goal is based on the number of active permits only and translates into 160 total inspections. These inspections are conducted by the same field staff that performs inspections on active construction sites and performs focused inspections (audits) of several of the minimum control measures under the MS4 permitting program. In addition, not all MS4 owned and operated facilities are required to obtain permit coverage under the industrial storm water permitting program. These facilities, when targeted for an inspection, will be considered as part of the industrial CMS commitment as many of the same elements are reviewed during the compliance inspection. Therefore, IDEM commits to 90 inspections per year between October 1 and September 30.

Status:

- e) Evaluate storm water violations and take timely action in accordance with the state's NPDES enforcement management system.

Status:

- f) Track storm water compliance monitoring and compliance assurance actions in accordance with established data requirements and reporting time frames.

Status:

- g) U.S. EPA R5 will be the lead on certain environmentally significant CSO communities, working in partnership with IDEM to reach agreement on approvable LTCPs and implementation schedules. U.S. EPA R5 will provide timely review and comment on technical nonrule policy and other documents submitted by IDEM (U.S. EPA PAM [SS-1]).

Status:

Joint State/U.S. EPA R5 Clean Water Act (CWA) Enforcement and Permitting Work Plan			W-6
IDEM Contact(s): Paul Higginbotham, Mark Stanifer & Mary Hoover	U.S. EPA R5 Contact(s): James Coleman, Jack Bajor & Ryan Bahr	Due Date: Annual Basis	
U.S. EPA R5 Role: Lead, assist or work share as specified in the annual work plan. U.S. EPA R5 will submit a summary report to Headquarters on behalf of the state by December 31 annually thereafter. Take action to improve performance if IDEM is not meeting performance expectations. Ensure compliance with all federal consent decrees and administrative orders.			
Goal 5:	Enforcing environmental laws.		
Objective 5.1:	Enforce environmental laws.		
Funding:	Federal/State (Permitting and Enforcement Grant)		

U.S. EPA R5 and IDEM, working together, will conduct a CWA annual planning process to identify and discuss national, regional and state priorities versus available resources at both the state and federal levels consistent with CWA Action Plan guidance, to be concluded no later than September 30 of each year. The resulting collaborative annual work plans will use all available mechanisms to get work done, such as federal and state work sharing and innovative approaches to monitoring facilities or addressing violations.

- a) Cooperate in developing and implementing the annual Joint State/U.S. EPA R5 CWA Enforcement and Permitting Work Plan.
- Participate in annual planning meetings to develop collaborative annual work plans, which may be conducted during the initiation and/or midterm PPA evaluations.

Status:

- Participate in routine and regular meetings to discuss progress toward meeting annual permitting and enforcement commitments, and discuss how the state has been performing overall in the NPDES program.

Status:

- b) Track priorities established and selected for each federal fiscal year.

Status:

- c) U.S. EPA R5 will lead, assist or work share, as specified, in the annual work plan. U.S. EPA R5 will submit a summary report to U.S. EPA Headquarters on behalf of the state annually, by December 31. U.S. EPA R5 will take action to improve performance if IDEM is not meeting performance expectations, and will ensure compliance with all federal Consent Decrees and Administrative Orders.

Status:

Compliance Monitoring Strategy (CMS) for Core National Pollution Discharge Elimination System (NPDES) Programs

W-7

IDEM Contact(s): a) Mark Stanifer & Bridget Murphy, b) Mark Stanifer c) – f) Mark Stanifer & Gary Starks

U.S. EPA R5 Contact(s): James Coleman, Jack Bajor & Patrick Kuefler

Due Date: a, b, c, d, g) Annual Basis; e, f) Ongoing.

U.S. EPA R5 Role: Provide program assistance.

Goal 5: Enforcing environmental laws.

Objective 5.1: Enforce environmental laws.

Funding: State

U.S. EPA HQ's current national CMS became effective at the beginning of Federal Fiscal year 2015. Indiana's continuing state-specific CMS, for purposes of this PPA agreement, runs from October 1, 2015, through September 30, 2017. The goal is to maintain an adequate enforcement and compliance assistance program to help ensure that NPDES violations are prevented and, when violations occur, they are adequately addressed.

a) NPDES Compliance Inspections from October 1, 2015, through September 30, 2017:

- Majors: - Of 185 total, conduct compliance evaluation inspections (CEI) or compliance sampling inspections (CSI) at 50% of major NPDES facilities annually. The goal is that 100% of the universe will receive a CEI or CSI inspection every two (2) years, in accordance with the national CMS.

Status:

- Minors – Of 722 total municipal and industrial "IN0" facilities: Traditional minor NPDES facilities, for purposes of the PPA, include individual non-major municipal and industrial facilities with permit numbers beginning with "IN0." Conduct inspections at 50% of "traditional" minor NPDES facilities annually. Half of those inspections are to be CEIs or CSIs. The goal is that 100% of the universe will receive some type of inspection every two (2) years and 100% of the universe will receive a CEI or CSI inspection every four (4) years.

Status:

- Minors – Of 172 total industrial pretreatment "INP" facilities: Conduct CEIs at 100% of the universe annually.

Status:

- Minors – Of 41 state and federal "IN0" facilities: Conduct CEIs at 100% of the universe every two (2) years.

Status:

- Major and minor mixed ownership or semi-public facilities: Of 269 total, conduct CEIs or CSIs at 50% of mixed ownership NPDES facilities annually. The goal is 100% of the universe will receive a CEI or CSI inspection every two (2) years.

Status:

- General permits "ING" facilities: Of 307 total, conduct CEIs, CSIs, or reconnaissance inspections at 25% of the universe each year. This excludes

facilities with general permit coverage such as MS4s, industrial storm water sites, construction storm water sites, and those covered under the vessel general permit.

Status:

- Respond to 100% of complaints.

Status:

- b) Conduct nine (9) industrial pretreatment audits annually (20% of approved local pretreatment programs) assuring that all SIUs for those programs have control mechanisms (U.S. EPA PAM [WQ-14a]).

Status:

- c) Conduct QA/QC reviews of submitted self-monitoring data to evaluate reliability.

Status:

- d) Significant non-compliers (SNC):

- Goals are to maintain the SNC rate for majors below 10%, as measured on a quarterly basis. SNC rate shall be below 17% on an annual basis.

Status:

- e) Evaluate all violations and take timely action (informal and formal), in accordance with the state's NPDES enforcement management system.

Status:

- f) Enter wastewater compliance monitoring and compliance assurance actions into Integrated Compliance Information System – National Pollution Discharge Elimination System (ICIS-NPDES), in accordance with established data requirements and reporting time frames.

Status:

- g) U.S. EPA R5 will provide program assistance.

Status:

Safe Drinking Water Act (SDWA)		W-8
IDEM Contact(s): a) & g) Stacey Jones, b, c, d, U.S. EPA R5 Contact(s): Tom Poy e) Al Lao f) Liz Melvin		Due Date: a, b, c, d, g) Ongoing; e) Annually f) Ongoing.
U.S. EPA R5 Role: a) Review and approve rules, b) Maintain and update the Safe Drinking Water Information System (SDWIS) database including the state version, SDWIS-state, c) Provide compliance assistance, e) Take necessary enforcement action to help reduce the level of non-compliance among small water systems, and f) Provide support for continued development and improvement of the SDWIS / Prime, and g) Encourage CWA/SDWA Program Integration.		
Goal 2:	Protect America's waters.	
Objective 2.1:	Protect human health.	
Funding:	PPG	

- a) Implement new federal safe drinking water rules, including re-codifying state rules as outlined in the Annual Resource Deployment Plan (ARDP).

Status:

- b) Submit all required federal reporting as referenced in the Annual Resource Deployment Plan (ARDP), which tracks Strategic Targets SDW-211, SP1.N11, SP2, SP4a, and SP4b, as well as Program Activity Measures SDW-01a, 04, 05, and SDWA02.

Status:

- c) Maintain the Public Water Supply Supervision Program by maintaining a database management system SDWIS that accurately tracks the inventory (including routine updates of system information), violations and enforcement, sampling information and compliance determination for all safe drinking water contaminants.

Status:

- d) All violations - All public water systems (PWSs) with violations will first receive a violation letter. For systems that do not correct the violation after receiving the violation letter, IDEM will initiate formal enforcement actions, as appropriate, consistent with agency policies and procedures.

Status:

- e) Maximum Contaminant Level and Treatment Technique Violations - 92% of population served by community water systems will receive drinking water that meets all applicable health-based drinking water standards through approaches including effective treatment and source water protection (SDW-211).

Status:

- f) Sanitary surveys at public water supply systems (PWSs) - Complete sanitary surveys at PWSs consistent with SDWA and as outlined in the ARDP.

Status

- g) Encourage CWA/SDWA Program Integration – Assist the Clean Water Act Program in development of a methodology for assessing drinking water use. Where possible, encourage data sharing and protection of surface water sources of drinking.

Status:

- h) U.S. EPA R5 will:
- Review and approve rules.
 - Maintain and update the SDWIS database including the state version, SDWIS-state.
 - Provide compliance assistance.
 - Take necessary enforcement action to help reduce the level of non-compliance among small water supply systems.
 - Provide support for continued development and improvement of SDWIS/Prime.

Status:

IDEM Contact(s): a), b) & d) Marylou Renshaw, Cyndi Wagner, & Stacey Sobat c) Chuck Bell

U.S. EPA R5 Contact(s): Linda Holst, Mari Nord, Pete Jackson & Ed Hammer

Due Date: Annually

U.S. EPA R5 Role: Provide assistance in revising monitoring strategy. Review and provide comments on draft and final products. Work with IDEM to implement the strategy and identify resources to address identified gaps. Work with IDEM to identify resources to address issues identified in the strategy and provide technical assistance/guidance as requested. Provide meeting support and travel support as available. Encourage CWA/SDWA Program integration.

Goal 2: Protect America's waters.

Objective 2.2: Protect and restore watersheds and aquatic ecosystems.

Funding: PPG

- a) Implement the 2011-2019 Water Monitoring Strategy in the 2015 and 2016 monitoring seasons (U.S. EPA PAM WQ-6a (FY15). IDEM will use the PPA update reporting procedures to provide information on progress, with the elements and level of details agreed upon by IDEM and U.S. EPA R5.

- Monitor waters, utilizing the probabilistic monitoring design to provide sufficient data to adequately assess the status of Indiana's surface water quality following the schedule identified in the IDEM Monitoring Strategy. During the current sampling season (summer 2015), IDEM will sample a minimum of 38 sites in the Upper Wabash basin. Next sampling season (summer 2016), IDEM will sample a minimum of 38 sites in the Lower Wabash basin (U.S. EPA PAM WQ-6a (FY-15).

Status:

- Monitor waters employing a targeted design based on the data quality objectives and to support the following: WQS development, NPDES permitting and compliance, public health advisories, to address emerging water quality issues, to determine water quality trends and to evaluate the performance of programs.

Status:

- b) Participate in regional monitoring newsletter, webinars and activities, as resources allow.

Status:

- c) IDEM will continue to implement a regular schedule to upload water quality data to U.S. EPA HQ's national Storage and Retrieval (STORET) system through an updated Assessment Information Management System (AIMS) database.

Status:

- d) IDEM will provide separate, timely reports, as required by the grant agreements, on all activities funded by the monitoring initiative funds (specific activities are identified in separate amended grant work plans, including implementation of the national surveys and monitoring strategy activities).

Status:

- e) Develop a methodology for assessing drinking water use. Where possible, encourage data sharing and protection of sources of drinking water.

Status:

f) U.S. EPA R5 will:

- Provide assistance in revising monitoring strategy.
- Review and provide comments on draft and final products.
- Work with IDEM to implement the strategy and identify resources to address identified gaps.
- Work with IDEM to identify resources to address issues identified in the strategy and provide technical assistance/guidance as requested.
- Work with IDEM to identify specific areas where CWA and SDWA resources can be used jointly to prevent and mitigate contamination of drinking water sources.

Status:

Water Quality Standards		W-10
IDEM Contact(s): a), b), c), d) & e) Martha Clark Mettler & Shivi Selvaratnam	U.S. EPA R5 Contact(s): Linda Holst & David Pfeifer	Due Date: Ongoing
U.S. EPA R5 Role: Participate in rulemaking workgroups or meetings, as requested by IDEM. Review draft IDEM work products and provide timely comments. To the extent that resources are available, assist IDEM with travel support for regional meetings, such as the Regional Technical Assistance Group (RTAG) and Water Quality Standards (WQS) meetings.		
Goal 2:	Protect America's waters.	
Objective 2.2:	Protect and restore watersheds and aquatic ecosystems.	
Funding:	Federal Water Quality Grants	

IDEM will work to complete timely water quality standards (WQS) revisions.

- a) IDEM will work with external stakeholders to update metals criteria to reflect current science. IDEM's goal is to have the revised metals criteria language by December 30, 2015.

Status:

- b) IDEM will revise the nutrient criteria development plan to accurately reflect achievable milestones, including, but not limited to, reevaluating data and assessing options to overcome implementation challenges (U.S. EPA PAMs WQ-1a, WQ-1d and WQ-26 (FY15)), participate in regional activities (Regional Technical Assistance Group (RTAG) meetings and conference calls), and provide U.S. EPA R5 with revisions to the nutrient criteria development plan by August 1 of each fiscal year and interim work products for U.S. EPA R5 input (U.S. EPA PAM WQ-1d and WQ-26 (FY15)).

Status:

- c) IDEM will evaluate updating human health methods and human health criteria outside of the Great Lakes Basin.

Status:

- d) IDEM will evaluate adopting of U.S. EPA's recently published 304(a) aquatic life criteria recommendations for ammonia and other pollutants (e.g., carbaryl, nonylphenol, acrolein, diazinon, etc).

Status:

- e) IDEM will review and initiate the process to update, if necessary, its multiple discharger variances for mercury.

Status:

- f) U.S. EPA R5 will:

- Participate in rulemaking workgroups or meetings, as requested by IDEM.
- Review draft IDEM work products and provide timely comments.
- Assist IDEM with travel support for regional meetings (RTAG, WQS) as resources are available.
